

List of Selected Abstracts

Poster No	Name	Poster Title
P1	Surita Basu	Adsorption of oil on self-organized patterns created on thin elastic polydimethylsiloxane film by adhesion and debonding
P2	Pawan Kumar	Nanosculpting in 2D monolayer for site specific photoluminescence modulation
P3	Neha Agrawal	Fabrication of Microfibrillar Composite Thin Film with Enhanced Mechanical Strength: Role of Modified Multiwall Carbon Nanotubes
P4	Kulwinder Kaur	Suppression of detrimental Cu ₂ -xS secondary phase by varying Zn/Sn ratio in Cu-Zn-Sn-S thin film solar cells
P5	kanika arora	Enhanced performance of solar-blind photodetector based on β -Ga ₂ O ₃ thin film grown on cost effective Si substrate by interface engineering
P6	Sanjay Singh	Selective Bacterial Detection using SERS-active silver nanorod array fabricated by Glancing Angle Deposition Technique
P7	shivani dhal	Structural And Interface Study of Single Walled Carbon Nanotubes Based Composite
P8	Leeladhar	Graphene Oxide/Polycarbonate bilayer-based infrared responsive photoactuators for smart curtain applications
P9	Sunita	Surface instability and morphology of incompressible and inhomogeneous soft elastic thin film
P10	Bhera Ram Tak	Structural investigation of gallium oxide thin films
P11	Chandra Shakher Pathak	Optimization of PEDOT:PSS films with co-solvents and their application in polymer solar cells
P12	Shashank Gahlaut	Dual mode mobile app based detection of live/dead bacteria using silver nanorods array fabricated by glancing angle deposition
P13	Chandra shekhar Sharan	Detection of dengue using surface enhance Raman spectroscopy
P14	Abhyay Vivek Agrawal	Role of Controlled Growth of Edge-enriched MoS ₂ Flakes in the sensing of H ₂ and NO ₂ gas
P15	Habeebur Rahman	Sensing of CO Gas by Silver Nanoparticles Decorated Zinc Oxide Pellet
P16	Huidrom Hemojit Singh	Lead Free Flexible Polyvinylidene fluoride Nanocomposite Based Piezoelectric Nanogenerator
P17	Parath Kumar Kasana	Raman Spectroscopic Investigations of Swift heavy ions irradiated RGO-MoS ₂ nanocomposites
P18	Tanmay Mahanta	Photocatalytic Degradation of Anionic and Cationic Dye in the presence of Nitrogen-doped MoS ₂ .
P19	Sandeep Munjal	A Comparative Study of ReRAM Devices based on CoFe ₂ O ₄ Nanoparticles and Thin Films
P20	Vinod Singh	Size selected palladium-carbon core-shell nanoparticales for hydrogen sensing applications
P21	Vivek Semwal	Fiber Optic Cholesterol Sensor Using Cholesterol Oxidase Immobilized Over The Graphene Oxide Nanosheets
P22	Ajay Kumar	Heterostructures of Sr _{2-x} LaxCoNbO ₆ (x=0 & 1) on STO/Si(100) grown by PLD
P23	Rajni Verma	Photodegradation of polypropylene film using TiO ₂ -based nanomaterials under solar irradiation

P24	Anisha Pathak	Carbon nanotubes based surface imprinted platform for plasmonics sensing of bovine serum albumin.
P25	V.S. Vendamani	Ordered Arrangement of High Density Hotspots on Si Nanowires for Effective Molecular Detection
P26	Rajeev Gupta	Synthesis of polystyrene/ZnO super hydrophobic coatings with high transparency
P27	Karra Vinod kumar	Effects of Thermal annealing and Gamma irradiation on HfO ₂ /GaAs based MOS devices
P28	Pinki Devi	Effect of oxygen vacancy defects in bimetallic (Cu-In) oxide catalyst on electro-chemical reduction of CO ₂
